Fourth Quarter Revenue of \$225.4 million, Up 23% Year-Over-Year

FINANCIAL HIGHLIGHTS

- Revenue of \$225.4 million for Q4'25 and \$836.6 million for full year 2025
- GAAP income from operations of \$19.4 million for Q4'25 and \$65.2 million for full year 2025
- GAAP net income of \$14.0 million or \$0.19 income per diluted share for Q4'25, and \$48.7 million or \$0.64 income per diluted share for full year 2025
- Non-GAAP operating income of \$24.7 million for Q4'25 and \$96.0 million for full year 2025
- Adjusted EBITDA of \$36.7 million for Q4'25 and \$145.0 million for full year 2025

SAN FRANCISCO--(BUSINESS WIRE)--Feb. 25, 2026-- NerdWallet, Inc. (Nasdaq: NRDS), which provides trustworthy financial guidance to consumers and small and mid-sized businesses (SMBs), today reported financial results for its fourth quarter ended December 31, 2025.

"We delivered Q4 revenue of \$225 million, up 23% year-over-year, contributing to full-year revenue of \$837 million, up 22% year-over-year," said Tim Chen, Co-Founder and Chief Executive Officer of NerdWallet. "Strength in performance marketing, direct, and non-search referral channels more than offset organic search headwinds as consumers turned to AI overviews and LLMs over traditional search. We saw particularly strong growth in personal loans and banking, which helped offset declines in credit cards and SMB. While we expect organic search to remain challenged, our focus remains on building durable consumer relationships and making NerdWallet a no-brainer destination for shopping financial products."

FOURTH QUARTER 2025 HIGHLIGHTS

- Insurance revenue of \$81.2 million increased 13% year-over-year, primarily due to an increase in auto insurance products as carriers expanded budgets.
- Credit cards revenue of \$26.5 million decreased 24% year-over-year, primarily due to continued headwinds in organic search traffic.
- SMB products revenue of \$22.5 million was down 12% year-over-year, primarily due to continued headwinds in organic search traffic.
- Loans revenue of \$42.3 million was up 141% year-over-year, primarily driven by growth in personal loans, as well as in mortgage loans.
- Emerging verticals revenue of \$52.9 million was up 57% year-over-year, primarily driven by growth in banking products.

SHARE REPURCHASE PLAN

On February 20, 2026, the Board of Directors of the Company approved an increase of \$100.0 million to the amount authorized under the Company's existing share repurchase program. As a result of this increase, the aggregate amount authorized for repurchases under the program is \$225 million.

Repurchases under the program may be made from time to time in open market transactions, privately negotiated transactions, or by other means in accordance with applicable securities laws and other restrictions. The timing, manner, price, and amount of repurchases will be determined by the Company at its discretion and will depend on a variety of factors, including market conditions, stock price, corporate and regulatory requirements, and other considerations.

The share repurchase program does not obligate the Company to acquire any particular amount of Class A common stock and may be suspended, modified, or discontinued at any time without prior notice.

NON-GAAP FINANCIAL MEASURES

We use non-GAAP operating income (loss), adjusted EBITDA and adjusted free cash flow in conjunction with GAAP measures as part of our overall assessment of our performance, including the preparation of our annual operating budget and quarterly forecasts, to evaluate the effectiveness of our business strategies, and to communicate with our Board of Directors concerning our financial performance.

Non-GAAP operating income (loss): We define non-GAAP operating income (loss) as income (loss) from operations adjusted to exclude depreciation and amortization, and further exclude (1) impairment of right-of-use asset, (2) losses (gains) on disposals of assets, (3) acquisition-related costs, and (4) restructuring charges. We also reduce income from operations, or increase loss from operations, for capitalized internally developed software costs.

Adjusted EBITDA: We define adjusted EBITDA as net income (loss) from continuing operations adjusted to exclude depreciation and amortization, interest income (expense), net, other gains (losses), net, and provision (benefit) for income taxes, and further exclude (1) impairment of right-of-use asset, (2) losses (gains) on disposals of assets, (3) stock-based compensation, (4) acquisition-related costs, and (5) restructuring charges.

The above items are excluded from our non-GAAP operating income (loss) and adjusted EBITDA measures because these items are non-cash in nature, or because the amounts are not driven by core operating results and renders comparisons with prior periods less meaningful. We deduct capitalized internally developed software costs in our non-GAAP operating income (loss) measure to reflect the cash impact of personnel costs incurred within the time period.

We believe that non-GAAP operating income (loss) and adjusted EBITDA provide useful information to investors and others in understanding and evaluating our operating results and in comparing operating results across periods. Moreover, non-GAAP operating income (loss) and adjusted EBITDA are key measurements used by our management internally to make operating decisions, including those related to analyzing operating expenses, evaluating performance, and performing strategic planning and annual budgeting. However, the use of these non-GAAP measures have certain limitations because they do not reflect all items of income and expense that affect our operations. Non-GAAP operating income (loss) and adjusted EBITDA have limitations as financial measures, should be considered as supplemental in nature, and are not meant as substitutes for the related financial information prepared in accordance with GAAP. These limitations include the following:

- Non-GAAP operating income (loss) and adjusted EBITDA exclude certain recurring, non-cash charges, such as amortization of software, depreciation of property and equipment, amortization of intangible assets, impairment of right-of-use asset, and (losses) gains on disposals of assets. Although these are non-cash charges, the assets being depreciated and amortized may have to be replaced in the future, and non-GAAP operating income (loss) and adjusted EBITDA do not reflect all cash requirements for such replacements or for new capital expenditure requirements;
- Non-GAAP operating income (loss) and adjusted EBITDA exclude acquisition-related costs, including acquisition-related retention compensation under compensatory retention

- agreements with certain key employees, and acquisition-related transaction expenses;
- Non-GAAP operating income (loss) and adjusted EBITDA exclude restructuring charges primarily consisting of severance payments, stock-based compensation, employee benefits, and related expenses for impacted employees, as well as contract termination costs, associated with our Restructuring Plan;
 - Adjusted EBITDA excludes stock-based compensation, including for acquisition-related inducement awards, which has been, and will continue to be for the foreseeable future, a significant recurring expense in our business and an important part of our compensation strategy; and
 - Adjusted EBITDA does not reflect interest income (expense) and other gains (losses), net, which include unrealized and realized gains and losses on foreign currency exchange, as well as certain nonrecurring gains (losses).

Adjusted free cash flow: We previously defined free cash flow as net cash provided by operating activities less capitalized software development costs and purchases of property and equipment. Effective with the first quarter of 2025, we further define our adjusted free cash flow to be free cash flow adjusted for any net borrowing or repayment on our warehouse line of credit which is used to fund mortgage loans originated for sale, as any increase or decrease in our mortgage loans held for sale is substantially offset by a corresponding borrowing or repayment on our warehouse line of credit. Adjusted free cash flow is a key measurement used by our management internally to evaluate our business performance and overall liquidity. We believe that adjusted free cash flow provides useful information for investors and others for determining the amount of cash available for investment in our business, strategic opportunities, repurchasing stock, strengthening our financial position and other purposes, as well as evaluating our historical and prospective liquidity. A limitation of the utility of adjusted free cash flow as a measure of financial performance and liquidity is that adjusted free cash flow does not represent the total increase or decrease in our cash balance for the period.

In addition, non-GAAP operating income (loss), adjusted EBITDA and adjusted free cash flow as we define them may not be comparable to similarly titled measures used by other companies. Because of these limitations, you should consider non-GAAP operating income (loss), adjusted EBITDA and adjusted free cash flow alongside other financial performance measures, including income (loss) from operations, net income (loss), cash flows from operating activities and our other GAAP results.

We compensate for these limitations by reconciling non-GAAP operating income (loss) to income (loss) from operations, adjusted EBITDA to net income (loss) and adjusted free cash flow to net cash provided by operating activities, the most directly comparable GAAP financial measures, as follows:

FINANCIAL OUTLOOK

We are providing guidance for the first quarter of 2026:

- Revenue is expected in the range of \$224-\$232 million, up 9% year-over-year at the midpoint
- GAAP operating income is expected in the range of \$22-\$27 million
- Non-GAAP operating income is expected in the range of \$28-\$32 million
- Adjusted EBITDA is expected in the range of \$40-\$44 million

We expect 2026 annual GAAP operating income in the range of \$72-\$89 million and non-GAAP operating income in the range of \$95-\$110 million. We also expect 2026 annual adjusted EBITDA in the range of \$143-\$158 million.

NerdWallet has not provided a quantitative reconciliation of forecasted GAAP net income (loss) to forecasted adjusted EBITDA within this communication because the Company is unable, without making unreasonable efforts, to calculate certain reconciling items with confidence. These items include, but are not limited to, income taxes which are directly impacted by unpredictable fluctuations in the market price of the Company's capital stock. These items, which could materially affect the computation of forward-looking GAAP net income (loss), are inherently uncertain and depend on various factors, many of which are outside of NerdWallet's control.

A reconciliation of forecasted GAAP operating income to forecasted non-GAAP operating income for forecasted first quarter 2026 and forecasted full year 2026 is as follows:

<i>(in millions)</i>	Forecasted First Quarter 2026	Forecasted Full Year 2026
GAAP operating income	\$22 - \$27	\$72 - \$89
Estimated adjustments for:		
Depreciation and amortization	9 - 10	37 - 41
Acquisition-related expenses	0 - 1	0 - 2
Capitalized internally developed software costs	(4) - (5)	(16) - (20)
Non-GAAP operating income	\$28 - \$32	\$95 - \$110

For more information regarding the non-GAAP financial measures discussed in this communication, please see "Non-GAAP Financial Measures" above.
